PROFILE

I am a software developer from Bangalore. I regard myself as a quick learner and a resilient team-mate. In love with open source and fast web apps

EXPERIENCE

FULL STACK DEVELOPER, ALGOKART.IN — DEC 2020 - PRESENT

Improved their React Web App by integrating chat which boosted their user signup percentage by 50%. Fully developed their android app using Flutter and ExpressJS in under a month for increasing product reach

DATA SCIENCE INTERN, MEGH COMPUTING INC — SEP 2020 - DEC 2020

Designed an object detection and object tracking pipeline in python which helped their warehouse be monitored 24x7 along with insightful statistical data about tracked objects

FULL STACK DEVELOPER, CAARYA LLC — APR 2020 - AUG 2020

Fully architected and developed a mobile dating app REHA for their reputed US client. The app is in beta currently on the play store and was built using PostgreSQL, NodeJS and React Native

FULL STACK DEVELOPER INTERN, FOUNTANE LLC — JAN 2020 - APR 2020

Helped develop ParkPoolr for their US client. The app is a parking rental app and I got to work with Google Maps, Places and Directions API. The app was built using React Native, NodeJS and PostgreSQL. The app is currently live on the US version of the Apple App Store

EDUCATION

BITS Pilani, Goa — B.E. (hons) Computer Science, Batch of 2021

SKILLS

- JavaScript, ReactJS, NodeJS, React Native, Docker, Amazon Elastic Beanstalk
- Amazon Web Services, Dart, Flutter, Flask, Python, GraphQL, HTML/CSS
- PostgreSQL, MongoDB, Redis, Firebase
- Intermediate Experience: WebAssembly, C/C++
- Theoretical Knowledge: Machine Learning, Neural Networks

PERSONAL PROJECTS

WEB PORTFOLIO

https://rishabh-anand.com

My portfolio was built using webpack, HTML/CSS and vanilla JavaScript. It detects the user's preferred view mode (i.e, dark or light mode) and gives the appropriate version. It has a Service Worker which also does client side caching for even faster re visits. Finally it includes an automated email reply feature built with NodeMailer

ASTROCHARTS

https://play.google.com/store/apps/details?id=com.astrocharts

While working on Reha, we had to look at astrology as it was an important user preference for selecting a partner in India. I had built an npm package which helped get birth chart and navamsa chart from the user's birth information. This app displays the charts in a beautiful form and gives other meta data about the charts. It has got 10+ installs

COMPETITIVE EXAMS

KVPY Exam: AIR 1328 (Lv.2 Awarded Fellowship Opportunity at IISc, Bangalore)
IIT JEE ADVANCED: AIR 5370
